SUMMARY

Computer Science student specialising in AI & Data Science with strong skills in Python, SQL, and data analysis. Experienced in data preprocessing, EDA, and visualisation using NumPy, Pandas, Matplotlib, and Seaborn. Familiar with front-end web technologies. Quick learner with analytical thinking and teamwork abilities.

EDUCATION

B.Tech – Artificial Intelligence & Data Science | SRM Valliammai Engineering College, Kattankulathur 2023 – 2027 | CGPA: 8.63

Higher Secondary (HSC) | New Sangeeth Matric Hr. Sec. School, Mimisal Score: 91.83%

PROJECTS

AI-Based Women Safety Alert System | Python, Node.js, JSON Hackathon Project

- Built an emergency alert system with SOS triggers for women's safety.
- Implemented automatic audio/video evidence capture and real-time notifications to emergency contacts.

AI Resume Analyzer – Smart Recruitment Assistant | Python, Node.js Own project

- Designed an AI platform that analyzes resumes and matches them with job requirements using ATS-based suggestions.
- Aimed at improving resume quality and increasing recruitment success rates students.

Freelancer for India – Skill-Based Job Platform | Python, Node.js Hackathon project

- Proposed a freelancing platform connecting individuals with jobs based on verified skills.
- Focused on inclusive employment and fair access to digital work opportunities across India.

Voice-Enabled File Access Assistant | Python, Node.js Mini project

- Developed a voice-controlled assistant to interact with local files using speech commands.
- Enables hands-free file access for improved accessibility.

TECHNICAL SKILLS

Languages	Python, C, C++	Frameworks	Node.js
Databases	SQL	Libraries	NumPy, Pandas, Matplotlib, Seaborn
Tools	VS Code, Jupyter Notebook, Power BI		

CERTIFICATIONS & HACKATHONS

- Python for Data Science – NPTEL (2025)
- Database Management Systems – NPTEL (2025)
- Participated in Hackathon at St. Joseph College of Engineering and Technology
- Participated in Hackathon at New Prince Shri Bhavani College of Engineering
